

Imagine Yourself in Radiology

Training in Radiology

Minimum of 5 years

- 1 yr General internship
- 4 yrs Radiology residency
- 1-2 yrs Fellowship

Post-Residency fellowships:

- Musculoskeletal
- Abdominal Imaging
- Neuroradiology
- Breast Imaging
- Nuclear Medicine
- Interventional Radiology
- Pediatric Radiology
- Emergency Radiology
- Thoracic Imaging
- Informatics

Who are Radiologists?

Radiologists are imaging experts with specialized knowledge in every field of medicine.

- They have an understanding of normal anatomy, diagnostics, pathophysiology and therapy.
- They consult for specialists daily in clinic as well as at tumor boards.
- Some radiologists do international medicine.

Radiologists see patients of all ages. Some patients are healthy while others are undergoing screenings or investigative imaging in order to diagnose and find the best treatment.
