*The theme for the 2018 meeting will be "Radiology Health and Well-being of the Profession and the Professional", and the A3CR2 programming will seek to build on these topics through unique sessions geared toward trainee education and professional development. We will have new dedicated sessions on leadership essentials, teaching methods, mentorship strategies, and social media development. The successful case-based review course has been updated with several new speakers, and engaging collaborative sessions such as the idea forum and problem solving sessions will remain key parts of the program. The Brogdon panel will focus on radiology burnout, moderated by Dr. Richard Gunderman. It is shaping up to be a fantastic 4 days of programming ... we look forward to seeing you all there!*
